

## Technical Information

Delkor EFB batteries with enhanced technology are suitable for start-stop vehicles that start the engine numerous times in a single journey. They have twice the level of endurance than conventional batteries and deliver consistently high performance to fulfill greater needs. Ideal for start-stop vehicles not equipped with regenerative braking system. Optimized EFB (Enhanced Flooded Battery) technology delivers outstanding levels of reliability, battery life and consistency in performance. Every single day.

## Features & Benefits

- Patented PowerFrame® grids extend battery life
- OE proven technology
- Designed for Idle Stop Start technology
- High charge acceptance
- High vibration resistance
- Certified non-spillable design

### Applications

Automotive

## Technical Specifications

<b>Battery Type</b>	EFB	<b>Case Material / Colour</b>	Polypropylene / Grey
<b>Voltage</b>	12V	<b>Lid Type / Colour</b>	VRLA / Grey
<b>Capacity (20Hr)</b>	58 Ah	<b>Grid Type</b>	PowerFrame® Positive & Negative Grids
<b>CCA (-18°C, SAE)</b>	500 A	<b>Separator Type</b>	
<b>Reserve Capacity (25A, SAE)</b>	92 minutes	<b>Assembly Layout</b>	LH Positive [ - + ]
		<b>Terminal Type</b>	SAE Std.
<b>Overall Size (LxWxH)</b>	238 x 128 x 224 mm	<b>Case Size</b>	NS60
<b>Nominal Weight</b>	24 kg	<b>Ledges</b>
